How to Connect to Employee_WiFi

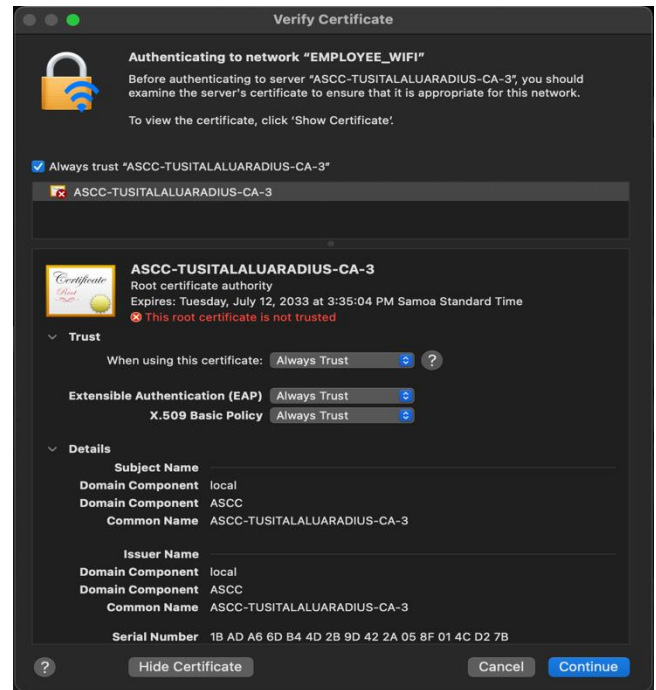

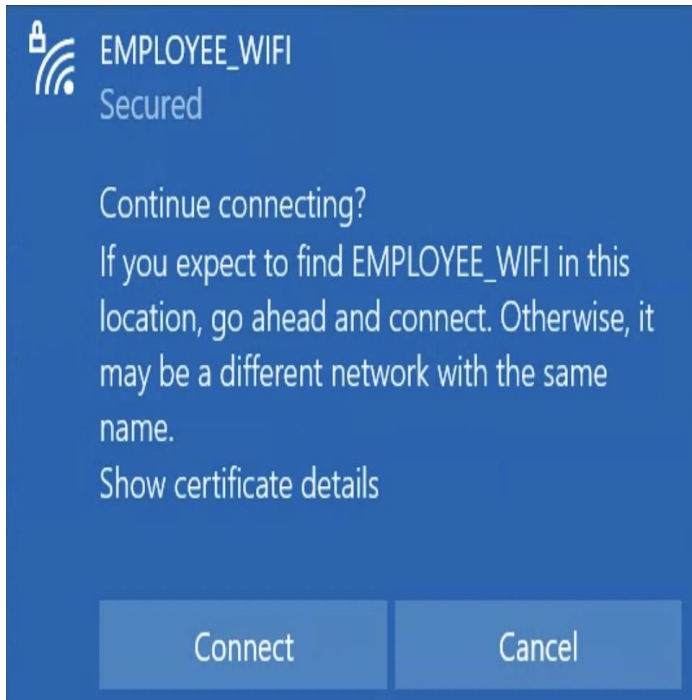

- 1) On the network options for wireless connections available, choose "Employee_Wifi"

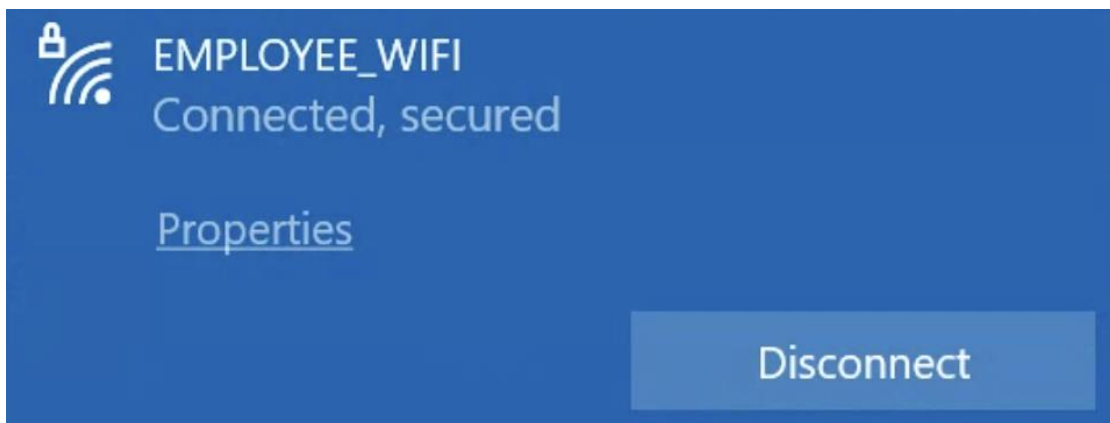

- 2) A window will open to input your ASCC user credentials. In this example input your username: j.doe@ascc.local and your password:

3) Next the window will open states “Continue connecting?” If you select to “Show certificate details” the certificate will appear informing the user of the notification of connecting to the ASCC network. From this point select “Continue”. However if you don’t wish to view the certificate select “Connect”.

4) Once you select “Connect” the display should show that you are connected to the Employee_WiFi.

5) If you have any issues connecting to the Employee_Wfi, please submit an Email to support@amsamoa.edu, call 699-9155 ext. 3402 or visit MIS Office, so that MIS technicians can troubleshoot the issue for you.
